COVERS THE  
DISTRICT

VOLUME 10, NUMBER 23

## THE WORLD OVER

CANADA'S EXPORTS GREATEST

COMMITTEE STUDIES BANK ACT

9000 TONS RUSSIAN OIL, CANADA

GERMANY DEMANDS ARM EQUAL

OTTAWA—Canada exported during the month of August Canadian produce to the value of \$4,314,119 and foreign produce \$541,062, or a total of \$4,855,181. During the same month there was imported for consumption \$26,584,036. This includes foreign goods afterwards re-exported. The export balance was accordingly \$5,271,066. These figures were released last Thursday by the Department of National Revenue.

RENTINA—To act under the chairmanship of Peter MacLean, Regina, the following have been named by the government to make up the Saskatchewan committee which will study the banking structure of Canada with a view of sending recommendations for some amendments to the Banking Act at Ottawa.

John Morrison, farmer, Yellowknife; Joseph Hill, farmer, North Portal; W. D. Dunbar, farmer, Yorkton; Harry Perry, representing Labor, Regina; A. W. Irwin, business man, Moose Jaw; J. D. Miller, wholesale grocer, Saskatoon; W. C. Paviour, merchant, Regina; R. H. Milford, barrister, Regina; T. A. McIntyre, Regina, secretary.

The committee will have a membership of ten. The members serve without remuneration.

The lander permit to enable 9000 tons of Russian oil aboard the Canadian tanker Anne Marck to be unloaded has not been received from the Department of National Revenue. The Anne Marck's load is the first shipment to reach Montreal in pursuance of an arrangement between the Russian authorities and the Aluminum Company of Canada to barter oil for aluminum ware. The shipment of crude oil came from Batum, in the Black Sea, and the consignment is the Lussell Petroleum Refinery Company.

LONDON—Germany's demand for equality in armaments received enthusiastic support today from Arthur Henderson, president of the world disarmament conference.

Speaking before the National Peace Council, Mr. Henderson who was the foreign secretary in the last British Labor cabinet, called upon the allied

# The Carbon Chronicle

CARBON, ALBERTA, THURSDAY, SEPTEMBER 15, 1932

The two 8-week old Eastern Canadian black bear cubs seen above were born on the Wolverine Hunting and Fishing Club grounds at Blisset, P.Q. They arrived in Montreal accompanied by Arth. Beaureau, well known guide. They were called Michael and Mary. As shown by the photograph, the cubs cannot lie, these two babies took early advantage of their first introduction to civilization to telephone Mother, though a little late for Mother's day, to assure her they were being well looked after. Michael is listening in while Mary is doing the telephoning. They have been fed on milk since their capture, but sugar is also a favorite article of diet.

The cubs were brought to Montreal by Canadian Pacific Express and went on to New York by the Windsor Station.

## OTTAWA HOUSE TO ASSEMBLE OCTOBER 6

Parliament will assemble Thursday, October 6th, and official announcement to this effect was made early Tuesday afternoon by Prime Minister Bennett. The announcement came following the meeting of the cabinet.

The session will be a regular one of both houses of parliament. Premier Bennett emphasized. This statement definitely set at rest a published report that the fall meeting would be a special session.

While no official intimation has been made, the likelihood is that parliament will sit for five or six weeks and powers of the World War to carry out the disarmament provisions of the Treaty of Versailles.

"Why should the World War allies get together and recollect that what was said in their names in 1918 must bind them?" Mr. Henderson demanded. "Why should they not publicly declare their intention to remove Germany's position of inferiority with all possible haste and to restore Germany equality in military status?"

Mr. Henderson said that the allied

## SCHOOL FAIR PROMISES TO EXCEED 1931

The Carbon and district school fair which will be held in the Carbon curling rink tomorrow (Friday) promises to be one of the best in years. The weather seems settled now and roads will be in shape to travel on. At the same time the rain the first part of the week has hindered thrashing operations and now will have time to attend the fair. Garden produce is being taken in now and many fine specimens have been reported in the line of vegetables.

If you have been denied on attending the school fair make up your mind now and bring in all the exhibits you can. This applies to school children only.

Mr. Alex Burns on the Lease has identified his intention to bring in for exhibition purposes only, some Japanese chickens and should arrive there will be an interesting variety for all visitors to behold.

Adjoins about the middle of November. Both houses would probably reassemble early in January.

The full part of the session it is expected, would be devoted almost entirely to consideration and ratification of the trade agreements entered into by Canada at the Imperial Conference.

## ALBERTA NEWS

For persistently refusing to take a job and set to work, Mr. Bodnaruk was sentenced to 30 days in jail Saturday under the variance act—Three Hills Capital.

The annual Alberta field trials will be held at Staveland on September 22, 23 and 24, and promises to be the most successful of any held by the association.

The wheat yield at High River is exceeding earlier expectations, according to local elevator men. The crops are running well and the true picture for the number of bushels of grain required to pay off your arrears to The Chronicle.

This is our contribution to bring about higher wheat prices and every farmer should take advantage of this offer and clear off his debt to this newspaper. He will probably never get another chance to do so at this rate.

men who refused harvest work have been charged with variance, and the city will press for jail sentences.

The British American Oil Company delivery truck was burned on the third day of last week at Carbon last Thursday. As there had been a recent rain the truck was slippery and the driver slipped off the road into the ditch. The driver left the truck in search of help when he returned the vehicle was in flames, probably as a result of a short circuit.

Married men on Calgary relief have been drafted for harvest service, and the first group left the city last week on for points south. A number who refused to accept harvest work have been sentenced from city relief, Sunday.

## FEDERAL GOVERNMENT FOLLOWS PRACTICE OF FINANCING CROPS

Western Wheat Pools Come Through Year in Better Financial Condition

ALBERTA POOL PAYS INTEREST

The Federal Government has guaranteed necessary credits for the conduct of the business of the three western Wheat Pools in such the same manner as it did last year, thus affording these organizations in the transaction of their business and also lending important assistance in the marketing of the western crop. This move furnishes relief to the governments of the three prairie provinces, as they would otherwise be required to make their own arrangements to permit Pools to obtain the necessary credits.

It is pleasing to note that authoritative statements have been issued to the effect that each provincial wheat pool came through the last crop year with an improved financial condition. Premier Brodeur stated that the Alberta Pool's elevator organization not only earned its full depreciation and the amount required to pay the interest on the amount of the provincial government guarantee but also retained certain other funds, thus improving its financial position, and

GRAVEL LAYING WILL BE COMPLETED FRIDAY

Laying of gravel on the Hanna-Calgary highway will be completed Friday morning, according to information furnished to the Herald late Wednesday. The trucks are now working with in a mile of town and all work is expected to be completed tomorrow. Although nothing of an official nature has been given out, it is understood that gravel will not be laid farther east than the western side of Hanna—The Hanna Herald.

on top of all this had a substantial profit. This situation is encouraging insofar as the province and the Pool membership is concerned. It means that the Alberta Pool is well on its way to financial re-establishment. While in other lines of activity and in other commodities there has been decided improvement and strengthening prices, the wheat situation has so far shown little improvement. In view of this the Dominion government's action, which certainly will tend to prevent uncertainty and disorder in the marketing of the crop, should receive the commendation of the people of Western Canada particularly—Calgary Herald.

## NASH'S GROCERY STORE BROKEN INTO EARLY ON FRIDAY MORNING

Quantity of Tobacco and Groceries Taken: Also Silver

DAPHNE NASH'S ENTERED ALSO

The C. H. Nash grocery store, and the Daphne Nash store were entered some time during the early hours of Friday morning, September 16th, and a quantity of goods and cash stolen.

The thief or thieves evidently entered from the rear door of the grocery store and succeeded in carrying off a quantity of tobacco and groceries, as well as the silver in the till, in the C. H. Nash store. They then ransacked the Daphne Nash store in the same building and took a number of silver spoons, of silver, looking taking the silver from the cash register.

Const. Morley of the R.C.M.P. is working on the case, but as yet we have had no report on any new developments in the case.

This is the third or fourth time that the C. H. Nash store has been broken into within the last few years and each time a similar loss has occurred.

THREE BUSHELS OF WHEAT FOR ONE YEAR'S SUBSCRIPTION

Again this year, as last, The Carbon Chronicle is offering subscribers in arrears a chance to pay their arrears up to date at the rate of three bushels of wheat for each year in arrears. This offer will be open for a limited time only and when delivering wheat to your local elevator have the true picture for the number of bushels of grain required to pay off your arrears to The Chronicle.

This is our contribution to bring about higher wheat prices and every farmer should take advantage of this offer and clear off his debt to this newspaper. He will probably never get another chance to do so at this rate.

men who refused harvest work have been charged with variance, and the city will press for jail sentences.

The British American Oil Company delivery truck was burned on the third day of last week at Carbon last Thursday. As there had been a recent rain the truck was slippery and the driver slipped off the road into the ditch. The driver left the truck in search of help when he returned the vehicle was in flames, probably as a result of a short circuit.

## Who Can Afford It?

By BRUCE B. BREWER, Vice Pres., Perry-Hardy Advertising Company

"They can afford it—I can't." That argument, used by a local merchant when he is reminded that large national concerns profitably use small city advertising space, simply doesn't hold water.

In the first place, the big national concern probably goes to largeness from a start in using small city advertising. Secondly, it costs the national advertiser far more to use the paper than it does the small city advertiser. The big advertiser must use thousands of copies. Divide the number of papers used into his total cost and you quickly see how costly it is for him, and yet he uses this advertising

\$2.00 A YEAR IN ADVANCE

SNOW AND RAIN

There is no doubt about it that the fall of the year is here. On Saturday the weather turned cold and high winds blew all day. That night rain set in and before morning it got colder and a little snow fell, although it did not amount to much. All day Sunday a drizzly rain fell and as a result harvesting in the district has been delayed.

WILL IT WORK OUT?

And now the financial Post gives us a power that will make the proposition of currency as we have it at present, think. Here is the conundrum: Kelowna, one of the fruit centres of the Okanagan valley in the interior of British Columbia, has accidentally discovered the actual good "phantom" dollar can do.

A man bought a tie from a dry goods merchant and gave him a cheque for a dollar. The merchant paid for his lunch at the cafe with the cheque; the cafe manager passed it on for something he needed, and it went from one hand to another, purchasing a dollar's worth of goods each time. It had been through twenty hands.

Then it was taken to the bank, where it was promptly marked "No Account." The 20 men who had endorsed it went into conference. They decided on a profit and loss and discovered that each man had made a profit of approximately 35 per cent. So they each contributed five cents and returned the cheque to the bank. Now they are trying to comprehend the principle underlying this bit of bank business.

## Long Years Ago

(Clipped from the Files of the Carbon News eleven years ago this month)

A fire broke out in Harry Thornburn's pool room last Sunday morning. The building and the dwelling next to it was completely destroyed.

The proprietor of the Commercial Cafe was arrested by Const. Carr, for having liquor in a public place, and was fined \$200 and costs by Mr. Oliver.

The snow on Friday morning put a little nip in the coal trade. Several coal mines are making haste with preparations for this year's shipments.

"Does your new chinese cook speak good English?"

"No, he speaks broken china."

"CARBON'S LEADING HARDWARE"

A. KLASSEN, MANAGER — PHONE 3. CARBON

## Homes And Jobs Needed

Position Of Young Men On Road Not Happy One

Comments from railway travelers about the large number of boys seen riding on freight trains have been substantiated by conservative authorities who estimate that between 200,000 to 300,000 youth from twelve to twenty years of age are now "on the road."

Another "roving army" of jobless youths is reported in Great Britain. Russia has been troubled by bands of children wandering about the country stealing what they could find.

The wanderers here represent a new type. They are not criminals, they are not delinquents, they are not even in any way inclined. In fact, some of them are fairly well educated. Broken homes reduce family income and unwillingness to remain a burden to an already large family are responsible for their wanderings. Their lot is not a happy one. Last winter a western city reported taking from freight trains thirty-five men and boys who were seriously ill. One railroad has reported fifty young men and boys killed and a hundred others injured during a single winter as the result of hopping trains. The best the wanderer can hope for in a town is two meals of bread, coffee and beans and the admonition to "move on."

Although a publicity campaign is planned to give warning of the dangers of "taking to the road," it can hardly be expected to prove a complete remedy. Both homes and jobs are needed to check these young men on the road.—New York Evening Post.

## Toll-Bridge Keeper Collects Rare Coins

Has One Half Dollar Which Is Century Old

Collectors of old and rare coins are advised to take jobs as toll bridge keepers, if they can get them, in order to augment their collections.

The experiences of employees of the toll bridge at Sunbury, Pennsylvania, justify the advice.

B. A. Wheeland, one of the collectors here, reported his latest find was a half-dollar coin in 1871. The coin was larger than the present 50-cent piece and caused Wheeland to hold up the motorist who gave it to him until the money could be examined. On one side was a head of "Miss Liberty" and on the other a spread eagle. On the edge were inscribed the letters "FIFTY CENTS." Convicted of its authenticity, Wheeland gave the motorist 40 cents change.

Other curious coins recently taken in by Wheeland included an English piece of silver, a Cuban coin and other foreign money.

## Act As Rest Cure

Sill Days Make People Respond To Stimulant Of Sunlight

Sir Henry Cavendish of England, discussing the effects of sunlight on health, said: "Our dull winters are all to the good. They act as a rest cure which is very beneficial. When the sunlight comes back we are in a position to respond to that stimulant."

When the Daylight Saving Bill was introduced, critics were concerned about the health of children. Staying up late at night they said could only do harm. The effects are entirely different. I have never heard of any authentic cases in which the extra hour has caused harm to the health of a child. Though there is much more mental activity the child is able to respond without fatigue. In Norway in the summer, the children play in the middle of the night, go to sleep just when they feel like it, and they seem none the worse for that. In the dark winter with no sun they almost hibernate and are dull and dispirited.

"Dad, lend me your pocket knife."  
"What for, son?"  
"To carve my name on the dining room table."—Gondagnigne-Slitz, Stockholm.

## PEACOCK IN FULL DRESS PARADE IN BEACON HILL PARK, VICTORIA, BRITISH COLUMBIA

Four Royal Golfers Men Most Careless In Crossing Street Sends Gift By Telegraph Clerk's Resourcefulness Helps Worried Husband Out Of Difficulty

**Four Royal Golfers**  
Sons Of King George Are Enthusiastic Over Game

The Prince of Wales's enthusiasm for golf has secured another royal convert, the Duke of Gloucester. The Prince was the first to catch the golfing fever, and he was very quickly followed by the Duke of York, who when he is in practice makes a very level match of it. Not long ago Prince George took to the game and had lessons from Archie Compston. He shows the same keen desire for practice as the Prince of Wales. And now the Duke of Gloucester has been playing golf while at Cowes with members of the Royal Yacht Squadron, and is planning to join a club in Berkshire. That means that all four brothers are now golfers, and I imagine that before long there will be some pretty tense battles between them, for they are keen rivals in sport. Prince George, doubtless will keep up his tennis and his love for playing the piano. Few people realize what a talented pianist he is, both of modern and classical music. He has the useful gift of being able to play over a tune he has only heard once.

**Walking Comes Back**  
Many City People Renewing Exercise In Healthful Exercise

Walking seems to be regaining its dignity. New York people who used to drop in to the subway to go six or eight blocks are now walking and leaving their nickel.

Walking for pleasure is also on the rise. There is not so much evidence of hordes of week-end hikers ostentatiously dressed for making mileage. But great numbers with unaccustomed leisure on their hands find walking is pleasant and healthful. They are eager to learn of quiet roads, free from dangerous traffic, shady and rustic—seaside.

To pay the Newark public library latest "Walks Near Newark," some twenty short trips. The list was revised from time to time, until the obsequy of the motor car made many lose the taste or the opportunity for walks. Renewed interest now prompts the library to ask for fresh suggestions about enjoyable trips from individuals or walking clubs.

**Enforcing the Migratory Birds Act**  
Officers of the Royal Canadian Mounted Police, acting for the National Parks Branch, Department of the Interior, which administers the Migratory Birds Convention Act in Canada, seized at Ottawa recently three live bobolinks (gophers) which were being kept in captivity as cage birds. The birds were taken to Rockcliffe Game Preserve and released in congenial surroundings. All wild birds are protected by Dominion and Provincial law and may not be kept in captivity. Persons violating these laws are liable to heavy penalties.

**Defects the Bumpers**  
A railroad company in England runs what is called the "whitewash special." The train carries no passengers, but it is equipped to nose every jolt and bump on the tracks. As a bump is hit, a splash of whitewash is dropped on the ground to mark the spot for repair crews.

**Guest (at country inn):** "Charming place this—is the old wing?"  
**Second Guest:** "Oh, yes, had it for lunch."

**Don't judge a man by his size. The biggest fiddle in the orchestra plays the finest notes.**

**New Zealand's butter output has increased 7 per cent. in the last year.**

## Men Most Careless In Crossing Street

**Women Show More Sense Opinions Of Winning Traffic Officer**

"Men are 'dumber' than women when it comes to crossing the street without ending up on a stretcher," says a Winnipeg policeman. He spoke as if he knew what he was talking about. More than 20 years of watching traffic and traffic-dodgers has given him plenty of experience.

"Men," he continued, "will walk in the path of an oncoming auto and time themselves so that it will barely miss them. They like to take chances and show off, especially the younger fellows. And you'll see them duck into a stream of moving autos and dodge their way across the street just to save a few seconds. Women show more sense."

With men it's most often a case of not looking where they're going. They have their minds on a business problem or a golf game or nothing in particular, and the next thing they know they're doing a loop. "It's hard to believe," said one civic official, "but I know of cases where a man has walked straight into the side of a street car, apparently without even knowing it was there until he hit it—and I've yet to see the man who can tackle a street car with any success."

With women, accidents usually result from their getting excited. They see, for instance, an approaching street car which they want to catch and they get so excited about getting to the tracks in time to flag it that they run into the path of an auto.

## New Evolution Of Science

Frozen Cider Will Keep Sweet For Several Months

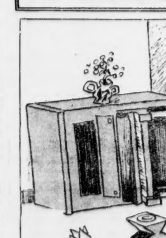

Modern science is always coming to the fore with some new wrinkle which extends the market for farm products. One of the latest evolutions is frozen sweet cider. When it comes from the press cider is frozen to zero degrees F. and held at that temperature until found for sale or use. When thawed out it is perfectly fresh and sweet. It will keep seven months or more held at zero, and there is every prospect that it will be developed into an important beverage outlet or by-product for orchardists.—Dominion Department of Agriculture.

Germany has 4,703 daily newspapers.

Industrial activity in Shanghai, China, is increasing.

## FANCIFUL FABLES

ISN'T IT NOODLEHEADIC? IT'S OUR OLD PIANO STANDING SIDEWAYS.

A London department store has installed for public inspection a new musical instrument, an extraordinary recording instrument.

## Sends Gift By Telegraph

**Clerk's Resourcefulness Helps Worried Husband Out Of Difficulty**

There is a familiar story about the old lady in the telegraph office: "Well, young man, if you're so smart you can send flowers and money by wire. I can't see why you can't telegraph an umbrella."

Maybe it could be done at that. Down in New York there is a grateful wife—grateful because her husband, though in Montreal, remembered her birthday; the husband is grateful for a telegraph clerk's resourcefulness, and in the Montreal office of Canadian National Telegraphs there is a clerk who declares that helping out harassed customers is all part of the day's work.

For a few moments, however, this touring husband presented a problem. It was his wife's birthday, she was in New York, and he had forgotten to arrange a present for the occasion. On the telegraph company help him out? They could and did. The clerk, with memories of having been handed a pot of flowers and asked to send them by wire, or a canary in a cage, suggested that perhaps a friend husband would like to transmit a real present. A nice handbag, for instance, was suggested. The arrangements were made by wire with New York, a handbag was purchased to be delivered at once to the tourist's home address. Life was again serene and the birthday had been duly and fittingly remembered.

## Insect Eating Plants

Michigan Swamps Are Home Of Three Common Ones

Three common insect-eating plants inhabit the swamps of Michigan—the pitcher plant, sundew and the bladderwort. The pitcher plant, which blooms in June and July, takes its name from the fact that its leaves are the shape of a pitcher. The bottom of the leaf is filled with a sweet汁 which attracts the insects. Downward-pointing hairs lining the sides of the leaves facilitate the descent of the prey.

Equally bloodthirsty is the sundew. This plant has leaves covered with numerous hair-like projections upon which are drops of a sweet fluid like dew. Attracted to these drops, insects fall between the hairs and are trapped.

The bladderwort grows in the waterways and is equipped with tiny bladders to entrap all sorts of insect life.

**Telephone Manners**

Being Courteous Over Phone Great Asset In Business

"Phone manners might well be made a compulsory study in the schools, business schools, at least. Everyone knows how nice it is to hear a pleasant voice over the telephone, and how annoying, short, curt, sarcastic or even impudent voices, late complainers on the phone are often scolded and frowned upon. It is a pity that in this time of depression I want her to be more economical."

A London department store has installed for public inspection a new musical instrument, an extraordinary recording instrument.

## Live Stock Feed

Investigation Work Under Way To Determine Relative Value Of Different Products

The ruthless prices of grain during the last couple of years has brought into interest in the relative value of different kinds of live stock feed. Early in 1931, wheat pool officials appealed to the Grain Research Committee, stating that in the preparation of a report for their members they had found great difficulty in finding authoritative published information, asking whether something could not be done to summarize the results of feeding experiments, particularly in regard to a home-grown product, and corn, a product largely imported.

The Committee found on inquiry that Professor E. W. Crompton, of Macdonald College, had already started some work along this line. They made a grant to assist him in extending the scope of his investigation to cover all the modern published literature available on the comparative value of wheat, oats, barley, rye and corn for feeding horses, cattle, sheep and swine. Postal feeding, it may be remarked in passing, is the new phase of a special investigation by Professor Hermer, of the University of Manitoba, assisted by the National Research Council. Professor Crompton's report should be ready for publication before the end of the current year. It will not only give extensive useful information on the value of these grains for feed, as shown by a statistical study of the results of over seventeen hundred experiments, but it will also indicate some of the lines along which future animal feeding experiments might profitably be directed.

## Fifteen Miles Per Hour

Speed At Which Harmsworth Trophy Was Won

The Harmsworth Trophy and speed on water have become synonymous in recent years. But it was not always so. With Carl Woods' "Miss America" and Kaye Don's "Miss England III," each capable of speeds above 120 miles an hour, it is almost inconceivable to imagine that the trophy once changed hands at a speed of 15.45 miles an hour. Yet it is true.

Back in 1906, three years after the race Lord Northcliffe (then Sir Alfred Harmsworth) placed the trophy in competition. Lord Montague de Beaulieu and L. de Rothschild, of England, built a challenger, "Narrow-Nipper," and went across the English Channel to France in an attempt to regain the trophy.

It was in this same race that America made its first bid for the trophy. W. Gould Brokaw, of New York, went aboard with a boat he chose to call the "Challenger." On the trip across the Atlantic, "Challenger" lost her protecting hood. The boat was riced with engines uncovered. With only three or four cylinders hitting at that she was beaten by only two minutes and the winner was "Narrow-Nipper," that is, the boat at the amazing speed of 15 miles an hour.

That's a far cry from the present speeds, but it happened only 20 years ago. Winning the Harmsworth at 15 miles an hour—it sounds like fiction when you look at the monster Wood and Don raced in this year's events.

**Grains Alone Not Enough**

Balanced Ration Is Necessary For Finishing Bacon Hogs

In order fully to realize the opportunity which is his in marketing bacon long the farmer of the prairie provinces, in particular, must realize as a fundamental fact that grains alone are not enough to finish a hog. Where milk in some form is available it supplies the ideal protein supplement, or balance, to the ration. And in many parts of Western Canada, in particular, milk in any form is scarce. In such cases tankage should be included in the feed mixture. It is an ideal supplement and adds zest to the feed even when milk is available in abundance. To make your home-grown feeds count you must feed a balanced ration, and tankage is a good means to this end.

**A Doubtful Compliment**

Guest: I wonder if you would mind giving me the recipe for that plum cake you served this afternoon at tea?

Hostess: Why, I'll be delighted to give it to you. But my wife makes the most beautiful plum cake!

Guest: I know. But in this time of depression I want her to be more economical.

## The Anglo-Irish Dispute

Britain Has Counted Cost And Empires Comes First

We must recognize that Britain and the Free State, under her present Government, have come definitely to the parting of the ways. The situation, in a sense, is strange, because, though it is almost desperately grave, there is here not the slightest excuse for animosity or hostility. The Free State can become a republic tomorrow without the loss of a single drop of blood. She is as free to walk out of the British Commonwealth of Nations as a man is free to walk out of church. Britain offers no threats, and has not the least desire to be vindictive. On the contrary, all her transactions with Mr. de Valera's Government have been abundant in goodwill. It is manifest, however, that Britain has counted the cost, and has decided that, as between Free State and Empire, she must choose Empire. She cannot afford to have as an ally and distrustful element in the British Commonwealth of Nations. Weekly Irish Times, Dublin.

## Peer Sells Historic Abbey

Was Founded Thousand Years Ago By King Athelstan

"It has been a privilege for me in the world's worst 67 bedrooms, I cannot possibly sleep in 67 bedrooms!" This Sir Eric Hambro, famous banker, explains why he sold rambling old Milton Abbey, historic Dorset seat of the Hambros, but to Sir Eric, just an irritating "white elephant" and a nuisance.

The name of the buyer of the venerable Abbey is not, for the present, made public.

Milton Abbey was founded a thousand years ago by King Athelstan, and remodelled in the 14th century by the Benedictine friars.

Except for the monks' hall and the refectory—a stately apartment with a row of "chapel oaks"—all the old buildings were pulled down in 1771.

The present house, with its 67 too many bedrooms, was built at that time by Sir Eric's grandfather. The same year, in that same year of 1771, didn't like having the ancient tower of Milton so close to his home, so he demolished the whole town, and built the model village of Milton Abbas at a more respectful distance!

The Hambros family came into possession of the Abbey, with its thick, cold walls, 67 bedrooms, and family ghosts; and without planning or heating, about the middle of the last century.

## Grains Alone Not Enough

Balanced Ration Is Necessary For Finishing Bacon Hogs

In order fully to realize the opportunity which is his in marketing bacon long the farmer of the prairie provinces, in particular, must realize as a fundamental fact that grains alone are not enough to finish a hog. Where milk in some form is available it supplies the ideal protein supplement, or balance, to the ration. And in many parts of Western Canada, in particular, milk in any form is scarce. In such cases tankage should be included in the feed mixture. It is an ideal supplement and adds zest to the feed even when milk is available in abundance. To make your home-grown feeds count you must feed a balanced ration, and tankage is a good means to this end.

"Can I have tomorrow off, ma'am?"

"Yes, why do you ask?"

"I was thinking of getting married, but if it can wait till I can have another day."—Euen Humor, Madrid.

N. W. N. 1930

## FAVOR EQUALITY IN ARMAMENTS FOR GERMANY

London, England.—Germany's demand for equality in armaments received enthusiastic support from Arthur Henderson, president of the world disarmament conference.

Speaking before the national peace council, Mr. Henderson, who was foreign secretary in the last British Labor cabinet, called upon the allied powers of the World War to carry out the disarmament provisions of the Treaty of Versailles.

"Why shouldn't the World War allies get together and recognize that what was said in their names in 1919 must bind them?" Mr. Henderson demanded.

"Why should they not publicly declare their intention to restore Germany's position of inferiority with all possible haste and to restore Germany's equality in military status?"

Mr. Henderson will visit Geneva to make preparations for the impending resumption of the disarmament conference. Admitting frankly that he was dissatisfied with the results of the conference thus far, he asserted it would be an "intolerable jest" if it failed.

The great mass of British opinion would rejoice in disarmament, Mr. Henderson said.

"We should greet with enthusiasm the abolition of monster battleships, submarines, tanks, huge land guns and more than anything, devilish forms of warfare, air and bombing."

"At last we are tired of tyranny of the armament mongers and are ready for any measure that will put an end to it."

He asserted he could not believe that "the statesmen who are to be assembled at Geneva in the course of the next few days are prepared to take responsibility for encouraging a competitive race in armaments and the inevitable danger of war."

"The claim of Germany to re-arm will present the conference with a most crucial question. If Germany withdrew from the conference she must estrange opinion in Europe. Surely there is a better way and I hope the better way will be taken."

### Will Reside in West

East of Egmont Has No Idea Of Forsaking the North

Macled, Alberta.—The Earl of Egmont, Alberta's 18-year-old rancher-earl, has no idea of forsaking the foothills and taking up residence with his young bride in England.

Passing through Macled from the Pacific Coast, where the newlywed spent their honeymoon, the earl declared he would reside at his little ranch at Frida, Alberta. He said he would make his home in the foothills of the land of his childhood.

The earl was married quietly in Calgary three weeks ago to Miss Anne Moodie, 18-year-old Calgary girl. Following the ceremony they left for Vancouver via Jasper Park. They will continue on their honeymoon journey into the United States.

### Gandhi's Threat

Effort Being Made To Prevent Mahatma From Starving Hunger Strike

Sims, India.—Powerful efforts are being organized to deter Mahatma Gandhi from carrying out his threat to start a hunger strike.

The victory talked for an hour with Rao Bahadur, representative of the untouchable class in the assembly who appealed to all classes to strive to save the life of "the greatest Indian of our time."

The Pandit Malviya, Hindu leader, was summoned to a conference at Delhi in the hope of reaching an agreement regarding representation of the untouchables, the issue which influenced Gandhi to threaten his campaign of starvation.

### Married School Teachers

Calgary, Alberta.—Women school teachers whose husbands earn good salaries may be dismissed by the Calgary School Board. At a recent meeting the school board decided to investigate and ascertain the number of women teachers on the staff whose husbands received sufficient wages to run the home without their wives working.

The Nanking government plans to erect a radio station capable of communicating with any station in the world.

W. N. U. 1960

### Farmers Hold Wheat

Alberta Farmers Show Tendency To Wait For Higher Prices

Calgary, Alberta.—Alberta farmers are showing a tendency to hold their wheat until higher prices appear, according to grain trade heads in Calgary. Farmers are being given an average price of 32 cents per bushel No. 1 Northern.

Alberta wheat pool officials state farmers feel grain should be held at all places where facilities are available. Storage places, however, are lacking in some centres and it is feared congestion may result in many districts.

Some farmers are urging that coarse grains also be retained until prices improve. They point out that present prices made delivery hardly worth while as No. 3 C.W. oats brought only 13 cents per bushel, No. 3 C.W. barley 12 cents, and No. 2 C.W. rye 13½ cents.

Pool heads strongly desired farmers in some districts were forming organizations for the purpose of holding their crops.

### Sees Better Times

Speaker At Chamber Of Commerce Gathering Looks For Improvement

Halifax, N.S.—Declaring Canada is "on the threshold of the upswing," Premier McCreight, of Windsor, Ont., gave a keynote of optimism to the seventh annual convention of the Canadian Chamber of Commerce.

"I am glad to be able to state that it is not only my opinion, but the opinion of many leaders that we are on the threshold of the upswing," he said.

But Colonel McGregor wished to make it clear he was not suggesting the advent of recovery.

"How could anybody seriously forward the idea of the advent of recovery when 1,000,000 unemployed on this continent alone?" he asked.

He was wary of the spectacular rise in stock prices.

### Slayer Pays Penalty

Russian Who Shot French President Dies On Guillotine

Paris, France.—Paul Gorguloff, half-mad Russian adventurer, died on the guillotine at St. Pierre prison for the assassination of President Paul Doumer of France. The knife of the guillotine fell at dawn Oct. 10.

The Russian fanatic's last hope of escaping the razor-edged knife of "the Widow" passed when President Albert Lebrun who succeeded Doumer, rejected his appeal for a commutation.

Dr. Gorguloff was not told of the decision until a half hour before his execution, in accordance with French law and custom. Then he was executed by his guard and lawyers, informed of the appeal's failure, and died unceremoniously to the guillotine.

### Freight For Bay Route

Will Shortly Discontinue Solicitation Of Freight For 1933 Season

Ottawa, Ont.—While the government takes no part in the operation of the Hudson Bay Railway and the Port of Churchill, the information that the Canadian National Railways will shortly discontinue the freight solicitation service for the new route is unofficially confirmed here.

The railway has been pushing the Hudson Bay route strongly in the past few months, but this effort will be stopped shortly prior to the closing of the Hudson Bay navigation season. The chief motive in discontinuing the service is to economize, it is pointed out that there is little purpose in soliciting freight for 1933 at this time.

### Remembrance Day

War Veterans Favor Stricter Observance Of Anniversary

Vancouver, B.C.—Believing that the importance of "Remembrance Day"—November 11—is not fully realized by the Canadian people, the eleventh annual convention of Amputees' Association of the Great War passed a strongly worded resolution favoring stricter observance of the anniversary.

"We pledge ourselves to do all in our power to see that this shall be sacred in our national life," the resolution declares. "We further appeal to the industrial and commercial life of Canada to follow the splendid example set by dominion, provincial, and municipal governments in closing down all but necessary works on 'Remembrance Day.'"

### No Fall Session

No Early Sitting Of Alberta Legislature Is Expected

Edmonton, Alberta.—A fall session of the Alberta legislature is not likely, it is stated by Premier Brownlee, and the action of the Dominion Government in calling parliament for October 6 will not have any effect upon the situation in this province so far as its own house is concerned.

Unless some unexpected emergency arises, it will not be necessary to call a sitting of the legislature before Christmas, said Premier Brownlee. If economic or other conditions should become sufficiently serious, it might be found desirable, but there does not appear at present, the premier said, any reason for such action this fall.

Mr. Brownlee intimated, however, that in any case an early session is possible after the new year will be arranged for the regular session.

### Dairy Barn Destroyed

Heavy Loss Sustained By Farmer Near Moose Jaw

Moose Jaw, Sask.—The huge barn of Fred H. Jones, prominent dairy farmer living two miles south of the city, was completely demolished by fire, incurring a loss estimated at \$23,000. Starting either from spontaneous combustion or from a short circuit in the electric wiring of the barn, the fire blazed uncontrolled for three hours.

The barn, measuring 270 feet by 96 feet, was valued at close to \$20,000, the feed which was stored inside was valued at \$2,000, milking machine equipment was valued at \$1,000, and 12 sets of harness were valued at about \$500. All these were a total loss.

## FREE STATE STILL CONCERNED OVER LAND ANNUITIES

Dublin, Irish Free State.—Both governments continue to maintain their strictest alliance concerning the terms of the latest note from the Free State to the United Kingdom in the dispute over the land annuities, but it was reported that President Eamon de Valera had declared that in event of failure to reach an agreement on the method of arbitration, he would use the monies so far withheld for the "relief of sufferers from the economic war."

The Free State so far has withheld payments of about \$10,000,000 on account of failure to reach agreement on the form of arbitration of the dispute—the Free State holding out for an international tribunal and the British government for an Imperial arbitral board.

President de Valera is expected to visit London for a day or so, and have a final interview with H. H. Thomas, Secretary for Dominion Affairs, before leaving for Geneva to attend the sessions of the league assembly.

### COMPLETION OF CANADA'S WAR MEMORIAL

Canada's War Memorial, which will in due course be erected on Parliament Hill, Ottawa, has now been completed at Farnborough, Kent, England, and for a short period will stand in Hyde Park, London, England. This picture shows the six March Brothers and sister standing before the three gigantic figures which form part of the memorial. The memorial consists of a huge arch through which pass representatives of the services who responded to the call for men during the World War.

### COMMENCES BIG WORK

James Purves, heraldic artist of London, Ontario, who has been given the task of inscribing some 68,000 names in the Book of Remembrance, which will be placed within the casquet of the Altar in the Memorial Chamber at Ottawa. The names will be written by hand on fine calfskin vellum.

### Aviators Burned Alive

Pilot and Pupul Met Horrible Death At Montreal

Montreal, Que.—Two men were burned alive in an airplane here as the machine went out of control and crashed to the ground. They were Captain Blaise A. Lebeuf, chief instructor of the Canadian Air Force, and a student pilot.

Lebeuf had taken Chambers up for one of his final lessons in "stunt" and "dives." The machine was used to alter when about 1,000 feet up. There was a roar when flames suddenly appeared about the engine and swept back over the occupants.

The plane then dove into a farmer's field near St. Hubert airport. There was an explosion as the machine struck the earth. So intense was the heat, no efforts at rescue could be made.

Captain Lebeuf was one of the most proficient flying instructors in Canada. He learned to fly in Windsor, Ont., and later joined the Royal Canadian Air Force. At Camp Borden he was regarded as one of the three outstanding instructors there.

A coroner's jury investigating the mishap returned a verdict of accidental death to both victims.

### Pay Roll Robbers

New Type Of Tor Gas Gun Is Demonstrated

Chicago.—Pay roll robbers are going to shed a lot of tor.

A new type of tor gas gun, so small it can be concealed in a coat sleeve and reputedly of sufficient power to route a whole gang of pay roll robbers was demonstrated at the Northwestern University Crime Detection Laboratory here. It is fastened to the wrist like a strap watch. A fine wire leads from the trigger to a ring in the middle finger. All one needs to do is lift up the arm and flick the finger and the trick is done.

### Says Empire Threatened

British Ideals Of International Trade Are In Danger

Toronto, Ont.—Suggestion that the very civilization Great Britain had created might destroy her in the end was made here by Dr. T. E. Gregory, of London, one of the world's leading economists, in an address. Cabinet ministers, professors, bankers and outstanding business men were in his audience.

Dr. Gregory questioned whether the British ideals of international trade and congress would win out, or whether the American ideal of less interest in international trade and more in mechanization of production would prevail in the next two decades.

"To we want civilization of the kind my country has created, and which may destroy my country in the end, or the kind America has created and may carry to a very triumphant conclusion?" Dr. Gregory questioned.

There was going on in the world a revolution in raw material that could not be checked, said Dr. Gregory. The raw material producing areas were going to resort to manufacturing in order to keep those busy who were being driven from the land.

### United States Farmers

Buy Manitoba Land

More Than Two Hundred Families Coming To Canada

Winnipeg, Man.—Over long distance telephone from Des Moines, Iowa, Senator L. E. Francis confirmed his association with W. H. Whidden, Winnipeg, in the purchase of 10,000 acres of land in Manitoba for United States farmers.

Mr. Whidden, who Manitoba Senator Francis when shown a despatch from Des Moines quoting Mr. Francis as saying "nothing to it," showed the Canadian Press reporter the title to the property and his contract with the United States senator.

With other parties Mr. Whidden is negotiating for 25,000 more acres in Manitoba. More than 200 United States farmer families will settle on the total acreage, he said. These farmers are coming to Canada, he said, because of higher prices received for farm products in Canada and the fertility of Manitoba soil.

## OTTAWA SESSION LIKELY TO MAKE NEW HISTORY

Ottawa, Ont.—Canada's parliament convening on October 6 will make new history.

Signs pointing to a full week's sitting of parliament in the four devoted almost entirely to intra-imperial trade. Perhaps in three weeks may suffice. To some extent opposition members will be a determining factor. And from that quarter there has been no official expression of views on the results of the Imperial Conference.

But in any event, approval of the trade pact will probably take place in time for adjournment on or before November 15. A recess until January 15 is expected.

The legislative programme when parliament reassembles in January will probably comprise:

(1) Legislation on the report of the transportation commission, headed by Mr. Justice Lyman P. Duff, of the supreme court of Canada.

(2) Approval of the Canada-United States St. Lawrence seaway treaty providing ratification has been already given by the United States senate.

(3) Amendments to the Finance Act.

(4) Introduction of redistribution bill.

From present indications, the budget will probably be brought down the financial year. Like the financial statement, the main estimates will not be tabled until early next year. Preliminary work on the estimates will likely be under way shortly.

A bill for redistribution of Dominion constituencies always follows the completion of Canada census every ten years. From the viewpoint of suggesting an election the measure consequently has no significance whatsoever.

Usually contentions amendments to the redistribution act go through a committee before being submitted to the Commons for enactment. This course will be followed during the coming session, it is stated.

The Finance bill, in all its ramifications will likely be reviewed by a special committee. Amendments to the act are promised for early next year.

## SHOULD EXTEND SHIPPING SEASON ON BAY ROUTE

Ottawa, Ont.—The Canadian government is moving to lengthen the shipping season out of Churchill, Manitoba's report on Hudson Bay, which, under existing insurance regulations, will have finished its first season of activity on a commercial basis at the end of this month.

Lowest insurance rates on shipping through Hudson Strait except September 30. By paying additional insurance it can be extended to October 7.

The government marine department has made representations to the marine insurance underwriters against the insurance expiration date, it was stated here, urging that instead of a strict liability set, this date should be movable, dependent on the season.

Officials of the department are considered the Hudson Bay route to be perfectly safe for shipping at least until the end of October this year, so it was said. But so far insurance underwriters have not agreed to set back the date on which lower insurance rates expire.

Seven vessels have picked up grain cargoes at Churchill since July this year, carrying a total of more than 2,000,000 bushels to Europe via the northern route. Still in store in the government-owned elevator at the Manitoba port are 1,250,000 bushels which might be moved out, it is held, if low insurance rates are left in effect until late in October.

### Trade With Russia

Report Canada Will Exchange Aluminum Products For Crude Oil

New York.—The Aluminum Company of Canada, Limited, has contracted with the Soviet government to exchange aluminum wire for crude oil, says the New York Times. The first shipment of oil will arrive on route to Montreal, the paper says.

The transaction is described by the newspaper as the first of a series by which Russia will buy goods from Canadian industries through the barter system.

An arrangement has been made by Aluminum with the La Salle Oil Company for the latter to refine oil and to distribute the product throughout Canada.

Russia will utilize the aluminum wire in its vast electrification programme, it is said, and is negotiating for the purchase of oil and coal and raw materials in exchange for items essential to the success of its industrial development.

### British Motorists Pay

More For Gasoline

Price Has Been Increased Nearly Twenty Per Cent.

London, England.—British motorists were hit by an increase of nearly 20 per cent. in gasoline prices, raising the standard grade to 39 cents a gallon.

The London Omnibus Company estimated the rise would increase its expenses more than \$1,000,000 a year. News of the increase caused a sharp rise in oil shares.

The growing army of small car owners had hoped the oil war which has given them cheaper gasoline would continue indefinitely but the inclusion of Romania and Russia in an agreement ended the price cutting.

### Support Is Withdrawn

Kaye Don Loses Sponsor In Speed Boat Race

New York.—Kaye Don, British speedboat driver and holder of the world record with Lord Wakefield's "Maid of the Mist," said he knew of no one in England who might take his former backer's place as sponsor of speed boat racing.

Lord Wakefield withdrew his support of Don and said he planned to withdraw entirely from further speedboat ventures.

Lord Wakefield is said to have spent at least £1,000,000 in the last few years promoting automobile, aircraft and airplane speed ventures.

### Reduced Unemployment

Calgary, Alberta.—Harvest work has reduced Alberta unemployed figures by 1,600 compared to the same period last year. The unemployment rate in the province's unemployment service there are 7,500 men still unemployed compared to 9,214 at this time in 1931.

# Challenge Government Statements As to Possibilities of Commercial Fishing In Hudson Bay Waters

Strong criticism of the Dominion Government report on the commercial fishing possibilities of Hudson Bay and Strait, is made in an analysis prepared by the Fish Committee of the Industrial Development Board of Manitoba, following release of the findings of the Hachey investigations of 1930.

Mr. Hachey's statement that "as a result of the total work covering the whole of Hudson Bay, not a single commercial fish was taken, hence it is quite easy to arrive at a definite conclusion that a deep water fishery of commercial importance does not exist in Hudson Bay," is challenged by the Committee with abundant evidence gathered from eminent authorities. This evidence indicates that commercial fish in substantial quantities do exist in both the Bay and the Straits.

The committee points out that, although the expedition left Halifax on July 26, returning on September 20, it actually spent only 90 hours in fishing operations.

Seven hours 15 minutes with hand lines; 12 hours 15 minutes with drift nets; 2 hours 50 minutes with long lines; 57 hours 50 minutes on traveling operations.

It further points out that, although the superficial area of the Hachey is 370,000 square miles, the record of sailing times supplied by Mr. Hachey shows that the expedition traversed, in the process of investigation, less than 5,000 nautical miles.

The report refers further to the fact that, for seven days investigations were conducted without bait.

The committee's report gives detailed information regarding the investigation of Dr. Alexander Hachey, who is attached to the Biological Board of Canada, at the University of Manitoba. This information proves the presence of commercial fish in Hudson Bay. Dr. Bajkow has in his possession specimens of cod caught by Mr. Hachey during his expedition. These cod are very small and young and thus might not possibly be brought within Mr. Hachey's category of "commercial fish," but the committee claims they constitute definite evidence that cod do exist in Hudson Bay and that the selective evidence submitted by Mr. Hachey to the effect that the waters of the Bay were too cold for reproduction, is open to question.

Dr. Bajkow is an eminent authority on the fish industry and has in his possession records of other expeditions into the White Sea and Arctic Oceans, in which the latitudes traversed and the equipment used are almost exactly similar to those of Mr. Hachey's expedition. This information indicates that had the Hachey expedition continued operations in September, it is quite possible that they would have found an entirely different situation in connection with the supply of cod in the Hachey waters. In the month of September, the Russian expedition found gigantic schools of cod in almost the latitude of Hudson Strait and under similar conditions all around, except that their expedition continued a little later in the season. Mr. Hachey with Halifax as his base and having to return before winter set in, could not prolong his investigations to that date, but not only anyone working from Halifax. But an expedition working from Churchill could do so and might conceivably find cod in September.

## Should Eat More Cheese

Canadians could do much for a great industry as well as contributing to their own sustenance in the use of a cheap and nutritive diet by a greater consumption of cheese. It has been made a staple food and be found on the table at all times.

Over 251 million acres were sown to wheat in the world last year.

What is the matter? "Ah, Doctor, I feel hardly get my arms over my head—and it is nearly the same with my legs."—Lustige Reise, Leipzig.

W. N. O. 1940

## Combine Harvester and Wheat Quality

Complaints Made That Grain Goes Out Of Condition In Storage

The combine has come into the Canadian West in large numbers in the last few years, and complaints have come from grain companies, who have to keep grain in storage in elevators, that the grain goes out of condition in storage. They claim that the grain appears to be "straight" when it comes in (i.e. containing not over 14.5 per cent. moisture), but that it spoils in storage, and when they look into its history they find that it is combined grain, cut and threshed without curing in the field.

The committee has arranged to attack this problem in a comprehensive way in all three provinces this season. Starting with a survey of the moisture content of standing crop as it approaches maturity, numerous samples will then be taken from different types of harvesting and threshing methods, including the binder, the combine, the straight combine, and the header-barge methods. The co-operation of both farmers and grain men has been secured, so that the grain can be followed through storage to see what changes take place. Extensive studies have been started on the process of "sweating" in storage. Out of the whole investigation it is hoped to obtain information that will make possible a statement of what is safe to do, whether the new methods of harvesting should be adopted, or what steps should be practised with suitable precautions.

## Wheat Exports

Sharp Increase Is Shown As Compared With Last Year

A sharp increase in the export of wheat from Canada to the United States and other foreign countries, including the United Kingdom, is shown in a report issued by the Dominion Bureau of Statistics.

In the five weeks ended September 1, export clearances amounted to 16,782,749 bushels. This compares with 10,473,083 bushels for the corresponding period last year. Practically one-half the clearances since August 1, 1937, have been for the five-week period. Both Montreal, with 8,517,900 bushels cleared, and Vancouver, 4,071,415 bushels, show heavy increases as compared with a year ago.

A feature of the bureau report is the statement the clearances of Canadian grain through United States ports show a marked decrease. The shipments since August 1 have totalled 1,973,909 bushels compared with 2,384,000 bushels shipped during the same period last year.

## University Work Co-Ordination

Working Plan For Four Western Institutions Has Possibilities

Co-ordination of the work of the four provincial universities in western Canada is not a new subject, according to Dr. James A. Maclean, president of the University of Manitoba. The matter has been considered from time to time by a committee of the Canadian universities conference.

In Dr. Maclean's opinion the proposal contains possibilities worthy of attention. He had not heard of latest proposals of President Brown of Alberta and declined to discuss the matter in detail. On the angles from which the question had been considered in the past was the emphasis in certain universities on some of the professional schools. For instance, the University of British Columbia might develop its school of marine engineering to a high degree and leave to other universities the task of developing high grade schools in other branches. By co-operation and agreement along this line there was an opportunity of avoiding unnecessary duplication and saving expenses.

## Much Ad About Nothing

"So you told Mrs. Brown, did you? And what did Mrs. Brown say?" the defending counsel asked the witness. Opposing counsel objected to the question as irrelevant, and a long and heated argument ensued before the judge allowed the question to be put. "Now!" exclaimed the triumphant counsel turning again to the witness, "what did Mrs. Brown say?" "Nothing," was the reply.

## Arranging For World's Fifth Poultry Congress

Italy Making Great Preparations For Show Next Year

Prof. Alessandro Ghigi, director-general of the 1933 World's Poultry Congress, was in Ottawa recently in connection with the fifth congress. Prof. Ghigi interviewed the Federal Minister of Agriculture concerning Canada's participation in the congress, which takes place in Rome, September, 1933. In addition to this he discussed with the Minister of the World's Poultry Science Council details of the congress.

According to the congress director-general, Italy is making great preparations for this event. The show will take place in the ancient market of the Trojans. The "market" is a circular gallery, six stories high, with an old Roman "Road" leading to each tier. From these "roads" open dozens of rooms in which the exhibits will be placed. The King of Italy is the royal patron and will probably open the congress. The Minister of Agriculture heartily endorses the congress and is expected to be present some time during the exhibition to meet the delegates.

## Farms In Canada

Heavy Increase In Number Of Farms In Last Ten Years

There were 17,574 more farms in Canada at the time of the 1931 census than in 1921, according to figures issued by the Dominion Bureau of Statistics. The total for 1931 was 728,961, and for 1921 it was 711,900.

There were decreases in the eastern provinces from Ontario to the sea, but increases in all the other provinces. Saskatchewan showed an increase of 17,021 in the decade. Alberta 14,454, British Columbia 4,106, and Manitoba 947. There were 41 farms in the Yukon.

Prince Edward Island had a decrease of 886; Nova Scotia, 7,988; New Brunswick, 8,890; Quebec, 1,862, and Ontario, 8,579. There was a total of 586,229 farms owned by their occupants, 74,862 tenanted, and 10,942 partially owned. Full ownership of farms decreased 1 per cent. in the decade, while tenant farmers increased 33 per cent.

## Empire Trade Ship

May Sail From England For Canada Next Spring

Response from manufacturers and exporters in the United Kingdom to an invitation to display their goods for the benefit of Canada buyers at Montreal on the liner "Laurentic" has not been sufficient to justify the sailing of the vessel on October 1st.

Numerous firms have indicated they are awaiting publication by the United Kingdom and Canadian Government the decisions arrived at during the Imperial Conference at Ottawa before exhibiting their goods. As these decisions will probably not be made public before the end of October it is hoped the empire trade ship will sail for the Dominion next spring.

## "Getting Even" Is Costly

Means Harm To Higher Character and Self-Respect

You cannot "get even" with one who does you an injury except by getting on his level; that is what evenness means. No possible ill from without can be equal to the harm you can inflict upon yourself by sinning against your own higher character and self-respect. "Getting even" with wrong, injury and selfishness is too costly an indulgence to be allowed.

This year, 4,000,000 British subjects in England must pay an income tax. Last year the number was 3,200,000.

Foreman: "Hi, why aren't you getting on with yer washing?" Workman: "Bill accidentally lent the pail to the minute hand, but I'll be round again in half an hour."—The Humorist, London, England.

Trainmen Were Puzzled

Trains Halted By Ants Breaking Contact In Signal Box

Ants, common red ants, stopped traffic on the Louisiana division of the Texas & Pacific Railroad for a time, much to the annoyance of everybody.

Passenger train No. 24, eastbound, encountered a red light near Scottville and halted. Trainmen were unable to find the cause. Train No. 24 had the same trouble. An investigation revealed that ants had worked into the signal box and formed the contact. Many ants had been electrocuted, breaking the current and causing the signal to remain red.

Scotland Wants Quiet Sunday

Scotland's annual campaign for quiet Sunday observance is being waged more vigorously this year than ever. Church meetings are being held in large cities, and prominent churchmen are denouncing Sunday trading, Sunday excursions and Sunday movies.

Compulsory insurance for autobus passengers has been decreed in Jugoslavia.

# Survey Results In Better Picture Of Weed Problem In The West And Points To Possible Remedy

## Intelligence and Ability

Are One and the Same Thing, So Scientists Say

Intelligence and ability are the same thing, and both are "inborn," the British Association for the Advancement of Science was told. The man with the highest intelligence is the man with the greatest number of inborn abilities, Prof. W. McDougall, noted psychologist. The difference in intelligence between man and the lower animals is really a difference in inborn abilities.

Intelligence, he explained, is a sort of outgrowth of instinct, and both are based on two things—propensities or "natural tests," and abilities. Instinct is a close linking-up of a "natural bent" with some particular ability. This close combination of the two governs actions of lower animals.

The secret of the ability of migrating birds to find their way accurately over long distances probably lies in powerful eyesight, enabling them to note landmarks, Prof. C. G. Patten told the association.

He expressed doubt that birds have an instinctive "sense of direction." Young birds are guided by older birds who have been over the route before.

## Facts About Tobacco

Weed Is Grown In Nearly Every Province Of The Dominion

Here are some interesting facts about tobacco growing in Canada supplied by the Department of Agriculture at Ottawa.

Tobacco growing was introduced by French settlers in the early colonial days.

Government assistance was first given in 1735.

In 1871, the year of the first decennial census, production was estimated at 399,870 pounds for Ontario and 1,105,345 pounds for Quebec.

In 1931 there were some 7,200 farms producing tobacco in Ontario alone, and approximately 70,000 persons were engaged in the production or manufacture of tobacco and its products.

Tobacco is grown in nearly every province in the Dominion; Canada's production of commercial tobacco for 1931 was estimated at 51,000,000 pounds.

## Backboard May Have To Go

Residents Of Isleboro On Peninsula Bay Want Cars

Few isolations are secure against the forward march of the automobile. Even Bermuda, in mid-ocean, has to be always on the alert to vote down the motor threat to its repose.

At Isleboro, however, on Penobscot Bay the backboard still reigns. Ten miles from shore, Isleboro has warded off the signal box, and the summer residents would gladly keep the machines as at arm's length indefinitely. But the permanent residents have grown restive at being deprived of a lively and entertaining instrument of civilization. They want automobiles more than they want quiet, and it is likely to get them, for the issue is coming up at a special town meeting.

## Support Is Promised

Canadian Provinces All Interested In Increasing Grain Shipments

All Canadian provinces are enthusiastically supporting the World's Grain Exhibition and Conference, according to reports from the chairmen of the exhibition and conference. The recent gathering of Federal and Provincial representatives called together at Toronto by Hon. Robert Weir, Federal Minister of Agriculture.

During the meeting, Hon. W. C. Buckle, Minister of Agriculture and the chairmen of the exhibition and conference, conferred with representatives of the provinces and technical men of the Federal Department of Agriculture upon matters in connection with the show at Regina next year.

Scotland's annual campaign for quiet Sunday observance is being waged more vigorously this year than ever. Church meetings are being held in large cities, and prominent churchmen are denouncing Sunday trading, Sunday excursions and Sunday movies.

Compulsory insurance for autobus passengers has been decreed in Jugoslavia.

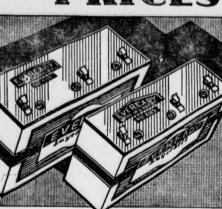

"The answer is in the affirmative," was the reply.

"Just like you do to everything by halves."—Moustique, Charlevoix.

"What is the matter?" "Ah, Doctor, I feel hardly get my arms over my head—and it is nearly the same with my legs."—Lustige Reise, Leipzig.

## THE HOUSE OF DREAMS-COME-TRUE

—BY—

MARGARET FIEDLER

Author of  
"The Rapturous Plot," "The Harlot of Far East,"  
"Hodder & Stoughton," Ltd., London.

## CHAPTER XXXII—Continued

Tortured beyond bearing, this faint, levelled at the woman he held more dear than anything in life, snatched his last thread of self-control.

He flung himself forward and his hands were gripping, gripping at the soft ivory throat from which the faint had sprung. He felt the woman writhe, struggling to pull his hands from her neck. But it meant nothing to him. He did not think of her any longer as a woman. She was something vile—leprous to the very core of her being—a thing to be destroyed. The thing which had made of all Jean's promised happiness a black and bitter mockery.

The mad Tormarin raged through his veins like a consuming fire. He would break her—break her and utterly destroy her just as one destroyed a deadly snake.

And then across the threshold that boat in his ears came the beloved voice, the voice that would have power to call him out of the depths of hell itself—Jean's voice.

"Blaise! Blaise! What are you doing? . . . Stop!"

## CHAPTER XXXIII

## The Dividing Sword

Slowly, reluctantly, Tormarin's hands loosened their clasp of Madame de Varigny's throat, and with a swift, flexible twist of the body she slipped aside and stood a few paces from him.

Jean looked from one to the other with horrified eyes.

"Madame de Varigny?—Blaise?" she stammered. "What is it?"

"Why, you—you might have killed her, Blaise!"

He stared at her blankly. His retorts of the Italian woman had been in mere blind response to Jean's first imperative appeal that he should desert. But the hints of ungovernable anger had finally yet cleared from

his brain: the blood still drummed in his ears like the roar of the sea.

"Blaise," Jean spoke imploringly. "What were you doing? Tell me!"

"With an effort he seemed to recover himself.

"It's a pity you didn't let me finish it, Jean," he said harshly. "Such women are better dead."

Madame de Varigny was fingering her neck delicately where the pressure of Blaise's grip had scored red marks on her cream-white flesh.

"Blaise," Jean spoke imploringly. "What were you doing? Tell me!"

"With an effort he seemed to recover himself.

"It's a pity you didn't let me finish it, Jean," he said harshly. "Such women are better dead."

Madame de Varigny was fingering her neck delicately where the pressure of Blaise's grip had scored red marks on her cream-white flesh.

"Blaise," Jean spoke imploringly. "What were you doing? Tell me!"

She turned again to Tormarin. "Tell me everything, Blaise," she said simply.

He took her outstretched hands and drew her slowly towards him. No one, reading now the calm, sedate, the stern impatience of endurance on his face, could have imagined it was that of the same man who, a few moments earlier, had been swept by such a tempest of uncontrollable anger.

"Jean," he said very gently and pitifully. "I'm afraid that what Madame de Varigny says may be true. I have no proof that it is not

"Nor have you any proof that it is not broken in Jean swiftly. She swung round on Madame de Varigny. "Where is your proof—where is your proof?"

The Italian smiled.

"Monseigneur Tor-ma-rin will find his wife in my car. I bade the chauffeur wait with it at the lodge gate."

"Do you mean you have brought Nesta—here?" cried Blaise.

"Why not?" replied Madame de Varigny, with a return to the same exasperating complacency with which she had originally described her whole scheme of revenge. "And—here? Surely her husband's house is the proper place to which to bring his wife?"

"She cannot remain here," said Blaise sternly.

"No? For the moment that was not my idea. I brought her here because I thought there could be no more convincing proof."

Blaise looked at her searchingly.

He fancied he detected a false note in her visible speech, and a new idea, presented itself to him. Was the woman simply putting up a gigantic bluff? Or was it really Nesta, his wife, waiting in the car at the lodge gates? It occurred to him as perfectly feasible that it might be merely some woman whose remarkable resemblance to the dead girl had suggested to the Countess's fertile brain the scheme that she should impersonate

His mind seized eagerly upon the idea, bolstering it up with Madame de Varigny's own admission. "I made little changes in her appearance," she had said. "The colour of her hair, the way of dressing it." Probably she was relying on those "little changes," and on the blurred recollection resulting from the length of time which had elapsed since Nesta's death, to add her in her place of introducing as his wife a woman who closely resembled her. He felt morally sure of it, and the light of hope suddenly shone

"I believe you are deceiving me," said quickly. "Lying—as you have lied all through the piece. I'll come and see for myself. You have waiting in the car for me"—grimly. He turned to Jean. "Isn't it curious, sweet-heart," he said in a low voice full of derision. "I believe you're deceiving me. The whole thing is a put-up job to separate us."

Jean smiled at him radiantly. She felt at once very confident. In a few minutes this nightmarish story of a Nesta still alive and claiming her rights as Blaise's wife would be proved a lie.

Tormarin crossed the room and opened the door.

"Now, Madame de Varigny—will you come with me?"

The woman hesitated a moment.

"Come," insisted Blaise firmly. "Or—are you afraid, after all, to bring me face to face with my wife?"

She shook her head.

"No," she said. "I am not afraid. It is only that I am so sorry—so sorry for the little Jean."

Her eyes, soft and dark and liquid as the eyes of a deer, sought Jean's beseechingly.

"I am so sorry," she repeated. And passed, slowly—almost unwillingly, it seemed, out of the room, followed by Tormarin.

Jean raised her head from Blaise's shoulder and pushed back her hair, damp with perspiration, from her forehead. It seemed to her as though she had been down, down into some awful, limitless abyss of darkness from which she was now feebly struggling back to a painful consciousness of material things. A great sea had surged over her head, blotting out everything, and remained poised above her like a huge black arch, imprisoning her in the vast, deserted chaos in which she found herself wandering. Then—after a long time, it seemed—it had surged away again and she could distinguish Blaise's face bent above her.

"Then—then it's true?" she said stupidly. Her voice sounded tiny, even to herself—a mere thread of sound. Blaise made no answer. He only held her a little closer in his arms. She supposed he hadn't heard that this little thread of voice, she must try again.

Is it true, Blaise? Is Nesta—

## Cabbage and Goitre

Medical Men See Some Connection Between Vegetable and Disease

Cabbage that pillar of the vegetable kingdom that brings vitamins cheaply to our tables, is under medical suspicion as a cause of goitre.

In his address to the Manitoba Medical Association in convention at Winnipeg, Dr. A. C. Abbott, Winnipeg, cited experiments carried out at Johns Hopkins University which showed winter cabbage caused goitre in rabbits in the short space of three weeks. He told of a survey he has recently completed among Winnipeg school children in which his findings bore out this theory.

Dr. Abbott found it significant that children of British extraction whose diet was varied, showed less than 12 per cent. affected thyroid glands while between 30 and 40 per cent. of children whose people came from Europe had enlarged thyroids. He found central Europeans to a tremendous amount of cabbage, in comparison with British people.

## Little Helps For This Week

A soft autumn turneth away wrath. Patience is not weakness. He who bears injuries without resentment triumphs in the end. Blessed are the meek for they shall inherit the earth.

"There's a time for work and a time for play."

A time for everything good came today.

But never a time in this short life for quarrels and angry words and strife.

Let us do anything for peace except fight for it.—Livingston.

## An Annual Custom

Children At St. Ives, England, Throw Dice For Bibles

Dice were thrown for Bibles at St. Ives, England, recently. The custom is observed annually, and three Anglican and three Nonconformist children each received a Testament. The custom follows the provisions of the will, dated 1688, of Dr. Robert Widd, the coat of the Bibles is defrayed by rents from land known as Bible Orchard.

## THE RHYMING OPTIMIST

By Aline Maclellan

## WITH THE TWILIGHT

Will you forget, at nightfall, The lances of mellow light, That rest upon the river, The tireless glances in flight?

The river, slowly nearing Its long-desired sea; Will you forget, at twilight, The prairie wind, and me?

Will you forget, at nightfall, Those scenes where once we moved, And all the falling pagan, Of beauty that we loved;

But e'en with the twilight, And those lost joys we knew, I shall be close creeping back, dear, I shall be near to you!

## Sixty Is Fairly Fast

A man who says he usually travels in the open country at 55 to 60 miles an hour writes to The Star that "speed maniacs" pass him going 70 to 75 miles an hour. No doubt these complain that they are sometimes passed by reckless persons driving 80 to 85 miles per hour. But isn't 60 miles an hour fairly fast in the first place?

Canada's Bacon Exports

Canada's exports of bacon to Great Britain increased from 184,576 pounds in July, 1932, to 2,480,000 pounds in July, 1933, putting her in fourth place among nations selling bacon to the United Kingdom.

## "WE FALL TO RISE"

It may be possible that the world is  
on the verge of better times. Certainly  
every indication points to more hope-  
ful feelings among the general popula-  
tion. It is felt that the worst has  
been passed and the going will now be  
easier.Alberta has been hard hit, along with  
all Canada, and almost every country  
in the world. But in this province  
have never reached the depths that  
many countries had to wade through.  
We have been fortunate in this re-  
spect even though the conditions are  
only comparative.When better times come along Al-  
berta will be in the van to greet them.  
Our possibilities for expansion are  
still great. We are a young, vigorous,  
thriving province. Our star of destiny  
has not yet reached its zenith.No one should expect that things  
should change quickly. It is generally  
realized that it will take a long while  
to get back to where the world was  
three years ago. But the world will  
recover and the shadows that darkened  
humanity's pathway for nearly 3  
years will eventually be lifted.Along the pathway that mankind  
has followed, adversity has frequently  
been met. At times it seemed as though  
recovery would never take place and  
that misery would be the lot of the  
majority of the people forever. This  
has never actually happened, and  
times returned and cheerfulness re-  
stored."We fall to rise, are healed to fight  
better, sleep to wake"—Hanna He-  
ald

too much yeast, but father says it  
was too much sugar.

## 440 Alberta Pool Elevators

Capacity 17,000,000 bushels

## Alberta Pool Terminal

Capacity 5,125,000 bushels

(3 Terminals Less) 4,000,000 capacity

Alberta grain growers' union built this well-balanced system  
of elevators. It is their contribution towards the development of the  
grain-controlled producers' co-operative movement.The support of Alberta grain growers is solicited in order to  
perpetuate and extend the usefulness of the Alberta Pool Elevator  
organization.
